Knowing what 'editorial' means

Jessica Adkisson/Opinionated Reader

Posted: 11/4/02

I have spent many a moment chuckling at something that I have read, be it cartoon, article or editorial. I faithfully read the school newspaper, looking to keep up on local news but also just for something to do. It is a good conversation starter, and informative enough for me to feel as though I am up to date on current events.

One of my favorite parts of the paper is the editorial section. I enjoy reading people's biased and opinionated viewpoints. If anything, it clarifies what I feel about a particular issue. I do not agree with all that Round Up Editor Heath Haussamen, or anyone else who writes for the paper for that matter, has to say. However, not once have I felt personally violated by the editorials. I know what editorial means (thanks college education) and I know what I believe. So if the editor of the paper wants to write about his opinion on the editorial page, then I say go for it — you would do the same thing.
